## CITY OF CALDWELL PRESS RELEASE

DATE: June 15, 2023

The City of Caldwell has reached an early milestone in its project to widen Ustick Road and reconstruct the Ustick Road and the Cleveland Boulevard intersection this summer. Drivers can expect major delays at the intersection Monday night (June 19) while traffic is shifted to newly paved lanes and crews prepare to widen the remaining roadway.

In addition, the city of Caldwell is executing a federal project to build a roundabout at the Ustick and Middleton Road intersection. The intersection will be closed from Tuesday, June 20 until early November as crews build the roundabout. A detour route will be in place and local businesses near the intersections will remain open during construction. The city encourages the community to continue to support these businesses as crews work to improve several intersections along Ustick Road.

“As important as it is to keep up with the growth in our city, we know construction can be difficult for local businesses,” said Mayor Jarom Wagoner. “I want members of our community to know that access to these businesses will remain open during construction. The continued support of the community is invaluable to these businesses and their employees.”

The overnight delays at the Cleveland Boulevard intersection will begin at 8 p.m. Monday, June 19. Crews will shift traffic from their current lanes to the opposite side of the road. Access to driveways may be temporarily limited. All traffic will be shifted by 7 a.m. June 20. This traffic configuration will remain in place until September.

The Ustick Road/Cleveland Boulevard project includes:

1. Widening Ustick Road to five lanes with sidewalk and bicycle lanes between I-84 and Lake Avenue.
2. Adding new right-turn lanes and improving left-turn lanes at the Ustick Road/Cleveland Boulevard intersection.
3. Adding a new traffic signal at the intersection.

Closures at the Middleton Road intersection will begin on Tuesday, June 20. Drivers will be detoured to side roads until November as crews build the new roundabout.
